## Channel switching

© Auto/Manual channel switching

| Auto switching | Select <br> switch | Manual swithcing |
| :--- | :--- | :--- |
| When pressing this for <br> 3sec. and the channel <br> auto switching <br> indicator turns ON <br> and channels switch <br> automatically. <br> (AUTO LED: ON) | SE | When press this once, the <br> channel indicator turns <br> ON and channels switch <br> manually <br> (AUTO LED: OFF) |

## © Auto channel switching

- The temperature of each channel is displayed during auto switching time and switching to the next channel automatically.
- Auto switching time is variable up to 10 sec . by the front VR.
- When it is auto channel switching, the channel auto switching indicator turns ON.

## © Manual channel switching

Whenever touching selection switch(SELECT), channel switches.
When a channel indicator turns ON, the temperature of the channel is displayed and whenever touching the switch, it moves to next channel.

## Selection of input sensor number by internal DIP switch

Max. 5 different sensors can be connected but do not use thermocouple and $\mathrm{Pt} 100 \Omega$ together.

| Sensor | 2 | 3 | 4 | 5 |
| :---: | :---: | :---: | :---: | :---: |
| DIP switch |  | $\text { ON } \begin{array}{r} 3 \\ \text { OFF } \\ \square \\ \square \\ \square \end{array}$ |  |  |

## Memory protection

When the power fails, the data value will be protected for 3 months.(The battery must be charged fully.)
